6	Description of Actions to Achieve Compliance
7	Vessel enroute to Texas City to discharge, entered N.A.ECA Area on 21st Jan 2015 with compliant LSFO i.e. <0.1% sulfur content. Vessel has onboard sufficient quantity to enter N.A.ECA Area, to arrive at Texas City port, to berth at Texas City and to commence discharge. However vessel do not have sufficient to complete her total discharge operation. Kindly note that enroute to Texas City at Galveston lightering area we have stemmed LSGO <0.1% to be supplied in order vessel to have sufficient to complete her discharge operation at Texas City and sail out of N.A.ECA Area. However due to bad weather condition at Galveston lightering area bunkering barge could not deliver the bunkers and vessel proceeding to Texas City without the extra bunkers required. Furthermore discharging terminal at Texas City do not allowing bunkering to take place alongside, therefore and in view vessel is scheduled to berth directly we have arranged bunkering after completion of discharge at Texas City at Galveston Lightering Area. Fyg, kindly note that prior present vessel's voyage from Cayo Arcas to Texas City vessel attempted to stem LSGO <0.1% at Corpus Christi but was not available.
